

## Lui Collins - Tech Sheet

Lui generally travels with a Pono tenor ukulele with an LRBaggs pickup, and a Bart Reiter 5-string open-back banjo.

Please provide the following:

1 vocal mic on boom stand (Shure SM58 or other good quality vocal mic is fine)

1 instrument mic on boom stand (Shure SM57 is fine) will work for the banjo. The boom stands are essential, as both stands need to be fully adjustable.

1 DI box for direct input from ukulele.

The basic sound system should be large enough to accommodate the size of the room comfortably, of good quality for music reproduction. It should include an amplifier, mixer with minimum of 3 inputs (often built into the amplifier), and 2 speakers. The small Bose systems usually work well in moderate-sized rooms, as long as they have a mixer with 3 inputs. With the exception of very small rooms, please provide a monitor.

Lui can bring with her a Shure SM58 vocal mic and Shure SM57 instrument mic, if you don't have access to good quality mics. Please advise in advance if this is needed.

If other musicians are accompanying Lui, please inquire about any additional microphones or inputs needed. If you have any questions about what is required, please contact Lui at [lui@luicollins.net](mailto:lui@luicollins.net).
